

Time Out for Genetics

Educational Webinar Series

Purpose: To provide stakeholders with information for better understanding of the relevance of genetic medicine to primary care. To increase awareness and education regarding the provision of genetic medicine in primary care. To improve health care providers' understanding of their roles and the roles of others related to the provision of genetic medicine in primary care settings.

Audience: Primary care clinicians, pediatricians, pediatric sub-specialists, family physicians, nurse practitioners, genetic counselors, geneticists, and other stakeholders.

Objective: The webinars will provide an introduction to the topic, explain the relevance to primary care, and showcase a few case examples of how the topic is relevant to primary care and can be integrated into everyday practice. Participants will be provided with practical take-home messages and strategies for implementation in practice.
