

A National Science Foundation-funded study is being conducted on mentoring of undergraduate life science researchers, with the aim of determining how undergraduate researchers are affected by being mentored by a graduate student, postdoctoral researcher, and/or faculty member. All undergraduates who have conducted life science research for one semester or summer in the past two years are eligible to participate. ***Responses are especially needed from students of color to determine whether mentoring experiences differ based on students' personal characteristics.*** Students can earn \$20 for participating. If you are interested in participating, please follow [THIS LINK](#) or email the lead researcher, Dr. Erin Dolan (eldolan@uga.edu).

Here is the link to the survey, just in case it doesn't come through:
