

We have a posting on [Trialect](#) soliciting applications for The Ford Foundation Fellowships for Life Sciences Research. This year the program will award approximately 36 dissertation fellowships, 24 postdoctoral fellowships, and 60 predoctoral fellowships. Fellowships are tenable at any fully accredited, non-proprietary (not for profit) U.S. institution of higher education. An applicant need not be accepted by the chosen institution at the time of application. As the application deadline is Monday, November 10, 2016, we are reaching out to see if you can refer your fellows/junior investigators to this program. The details can be perused at:
