

# Boost Your Research and Scholarship Skills

A collaboration between Alabama College of Osteopathic Medicine, California Health Sciences University, Idaho College of Osteopathic Medicine, Kansas City University, Philadelphia College of Osteopathic Medicine, and Western University of Health Sciences.

## Quality Improvement Projects

**Wednesday, May 10, 2023 | 11:00 - 11:30 PST**

While not always seen as scholarly work, quality improvement (QI) projects are how many research findings get implemented into healthcare settings. Attend this session to learn the general principles behind QI, what goes into running a QI project and how to get involved in a QI project of your own.

Presented by:

Molly Montgomery, MLS, MS

Idaho College of Osteopathic Medicine

## Lexicomp and the Medical Letter

**Tuesday, May 30, 2023 | 12:00 - 12:30 PST**

Join us for a brief review of two important clinical drug information resources: Lexicomp and The Medical Letter.

Lexicomp is a collection of clinical databases and clinical decision support tools providing access to clinical drug resources, including calculators, identifiers, interaction and overdose assessments, and patient education resources.

The Medical Letter provides independent, objective, practical, and timely information on drugs and treatments of common diseases to help readers make the best decisions for their patients—without the influence of the pharmaceutical industry.

Presented by:

Alexander Lyubechansky, MA, MLIS

University of Nevada, Reno - School of Medicine
